Re: RO Corporation Closure Plan
EPA I.D. Number: KSD007171176

Dear Mr. Goetz:

Pursuant to our telecons and meeting during the last week, I wish to rescind my letter of May 6, 1986 (attached).

Our analysis of soil samples in the vicinity of the storage areas indicated that there are no EP Toxic hazardous wastes present. However, some results indicated EP Toxicity values slightly in excess of the background values reported by the laboratory. A summary of these results is attached for your review.

As we discussed today, RO will amend the Closure Plan within 45 days to address actions to be taken in response to the above analytical data. Additional sampling may be conducted to further characterize the background conditions and/or storage areas. No remedial activities will be initiated for the storage areas prior to approval of any amendments to the Closure Plan.

If you have any questions or further comments, please don't hesitate to call the undersigned or Mr. John H. Duffey at 491-3708.

Sincerely,

ETI OF NORTH AMERICA, INC.
